Mt Maude

Wanaka

Pinot Noir

2024

Vintage Summary

The growing season was notably dynamic, transitioning from La Niña to the onset of El Niño and saw a variety of unpredictable weather patterns, including hailstorms, spring and autumn frost events.

Fortunately, our vineyards escaped the hail, but we were not so lucky with the late October frost where we experienced a 20–40% damage to certain blocks, including Mt Maude.

As we entered the new year, we experienced sunny, dry conditions accompanied by a cooler ripening period. Harvest commenced 7–10 days earlier than the previous year, yielding fruit with intense flavour profiles and excellent quality although a much-reduced quantity.
